

U.S. 3T Loaner Program

October 18, 2016

In response to the October 13, 2016 communications from the FDA and CDC about the Stöckert 3T Heater-Cooler System (3T), manufactured by LivaNova PLC's subsidiary Sorin Group Deutschland GmbH ("LivaNova"), LivaNova is establishing a new program to provide loaner Heater-Cooler devices to certain existing 3T users. Under this program, each U.S. hospital that is actively using the 3T Heater-Cooler may be eligible to receive one loaner 3T device. However, availability is limited and the company will implement a prioritization process consistent with FDA and CDC recommendations to allocate available units.

There will be no charge for the 3T loaner device, shipping, installation or service. All 3T devices placed under the loaner program will be new devices and will be supplied with new polyethylene tubing and connectors. For your convenience, other accessories, including water filters, can be purchased from LivaNova.

You may submit your loaner request one of two ways:

1. Complete the Loaner Request Form and Certificate of Medical Necessity Form, available for download at www.livanova.sorin.com/3T, and email them to sorin6564@stericycle.com
2. Call Stericycle at 1-888-570-1653 and they will assist you in completing the necessary forms

All loaner requests should be completed and submitted before **October 31st**, after which your request will be considered for prioritization by an internal, cross-functional committee. If approved, you will receive a loaner agreement and request for a no charge purchase order.

If you have any questions, please contact your local LivaNova sales representative.

NOTE: This program is exclusively for U.S. hospitals and is not available outside the U.S.
